Product description

SKYLIGHT AQI-60S INTENSE

UNIQUE SPECTRUM INTENSE series lamps produce vivid colours and their spectral emission is characteristic for

so called RGB lamps. What is unique and innovative on this RGB aquarium light is the broadening of spectrum with deep and far red. This allows for the appropriate activation of phytochromes both in Pr and Pfr stage. Far red light deeply penetrates plant tissue allowing shaded parts of plants to photosynthesize too.

SHIMMER In contrast to the vast majority of RGB lamps, SKYLIGHT INTENSE lights generate light reflections similar to those appearing when HQI lamps are used.

CHARACTERISTIC DESIGN Laser cut lamp casing looks quite different to the constructions based on side-sealed aluminium profiles. Casing finish is achieved with double layer of protective coating in the metallic anthracite colour.

DIMMABLE Using an external dimmer the Skylight INTENSE series lamps allow for light output adjustment to different demands of cultivated plants. Owing to the 2-channel construction also the colour temperature may be adjusted to better fit the user aesthetic expectations. As a result the INTENSE series will please the owner of a nature planted aquarium but is also adjustable to different biotope projects.

MOUNTING FREEDOM INTENSE series lamps are manufactured in 2 different configurations. The H version is equipped with acrylic holders and the lamp is put on aquarium edges. The S version is equipped with a metal wire hanging suspension kit that allows to hang the lamp over the aquarium. In the S version semi-transparent shades are included to protect the user eyes, when the lamp is hanging high above the ground.

TECHNICAL SPECIFICATION

Dimensions	57x12 cm
Power rating	48 W
Luminous flux	3600 lm
Colour Temperature	5000- 15000 K adjusted
CRI	79
Voltage	12 V DC
Current	4 A
Output cable length	2,5 m*
Suggested aquarium width	60-75 cm
Max length of the hanging suspension kit	150 cm

*Lamp input cable: 0,75 m / Lamp cable extender: 0,75 m / Power adapter output cable: 1 m
